

FREQUENSEA®

YOU CAN FINALLY UTILIZE EVERY SINGLE NUTRIENT
FROM THE WORLD'S BEST WHOLE-FOOD NUTRITION.

FrequenSea® brings you the best of nature, from both land and sea! This whole-food supplement features marine phytoplankton in a delicious and unique base of high-quality ingredients.

BENEFITS OF MARINE PHYTOPLANKTON

- Promotes better sleep quality
- Supports liver health
- Improves look and feel of skin
- Supports healthy joints
- Helps maintain blood sugar levels already within a normal range
- Improves mood and healthy sense of well-being
- Increases energy and focus
- Supports healthy immune function

ONLY THE BEST INGREDIENTS

- Ionic Sea Minerals
- Frankincense
- Orange
- Noni
- Ginger
- Rose
- Nutmeg
- Astaxanthin
- Aloe Vera
- Rosemary
- Sweet Lime
- Blueberry
- Grape
- Passion Fruit
- Cranberry
- Omega Oils

TIMELESS, NOT TRENDY

Your health is not a trend. It's as timeless as the sky is blue! In a world of manmade foods that have been chemically-altered, genetically-modified and loaded with preservatives, edifying our bodies with whole-food nutrition is increasingly important.

Considered nature's "superfood", marine phytoplankton is a whole food source that is known in nature to have a full spectrum of amino acids, trace minerals, vitamins, enzymes, micronutrients, essential fatty acids, and antioxidants. It's no secret that nutrients work best in combination with each other, and FrequenSea with marine phytoplankton offers the best combination available to man.

FREQUENSEA®

BETTER DELIVERY

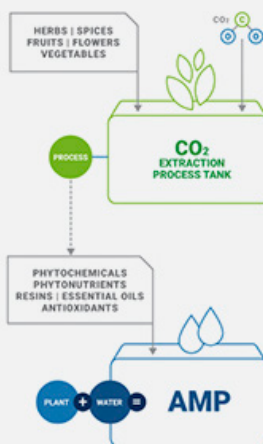

Most nutritional supplements are made from synthetic vitamins, fillers and inorganic minerals that our bodies have difficulty absorbing, leaving very few nutrients to actually be utilized. Nature intended for us to benefit from the whole plant!

Luckily, every plant ingredient in FrequenSea has been "AMPed"! Aqueous Molecular Partitioning (AMP) is a patented technology that uses CO₂ extraction to preserve the essential oils, resins and antioxidant-rich phytonutrients of entire plants, without the use of heat or chemicals. Plus, the AMP extraction process results in a highly-concentrated liquid that contains the benefits of the entire plant in a water-soluble form.

Since the body is up to 75 percent water, and 90 percent of the molecules in the brain are water, nothing carries nutrients into our cells more effectively than water. Exclusive to ForeverGreen, the powerful, unique and environmentally-conscious AMP process captures the benefits of the entire plant and delivers them to your body in the most absorbable form.

FrequenSea also features "open cell" marine phytoplankton. Since the human body lacks the enzyme required to break down the silica shell that naturally encases marine phytoplankton, the nutrients from most marine phytoplankton products are never absorbed. By contrast, marine phytoplankton offered exclusively from ForeverGreen has been harvested using patented technology that removes this shell without the use of heat, freezing, or chemicals, allowing the body to utilize each and every nutrient.

Exclusive to ForeverGreen, the powerful, unique and environmentally-conscious AMP process captures the benefits of the entire plant and delivers them to your body in the most absorbable form.

MARINE PHYTOPLANKTON

THE BREATH OF LIFE

Marine phytoplankton are microscopic single-celled plants that thrive in the earth's oceans and are essential to the sustainability of life on the planet. Not only are they the base of the marine food chain, but marine phytoplankton are also thought to be responsible for up to three-quarters of the earth's oxygen. Through a process called photosynthesis, marine phytoplankton absorb the energy from the sun and nutrients from the water and release an incredible amount of oxygen into the atmosphere. Scientists agree there is oxygen from marine phytoplankton in every breath we take!

MARINE PHYTOPLANKTON

OUR COMMITMENT

ForeverGreen has an exclusive partnership with a sea farm in the pristine temperate coastal waters of the Pacific Northwest. In this specific location, ocean tides interact with fresh water creating turbulence that draws even more deep-water nutrients and supports a diverse array of more than 200 marine phytoplankton species.

ForeverGreen marine phytoplankton is wild-grown in a natural environment at a facility that is eco-friendly and creates a positive carbon footprint. Each batch is quality tested for bacteria, pathogens, toxins, heavy metals, mold and radioactivity prior to being approved for human consumption.

MARINE PHYTOPLANKTON

IT'S EASY!

The most nutrient-dense naturally-occurring whole-food plant on earth is marine phytoplankton. The purest, most nutritionally-complex marine phytoplankton available to man is brought to you exclusively by ForeverGreen. Check out our entire line of products featuring our exclusive marine phytoplankton nutrition.
